Personal statement

I have over 20 years of experience developing, implementing, and evaluating social interventions for children and families in over 25 countries around the world.

I am a senior research and teaching fellow based at the University of Oxford Department of Social Policy and Intervention. My research is focused the implementation, effectiveness, and scale-up of programmes that improve child and family wellbeing and mental health outcomes in low- and middle-income countries.

I am the lead principal investigator of the Global Parenting Initiative which is a 5-year \$22 million project aimed at expanding the evidence and impact of human-digital playful parenting interventions in the Global South. I am also a principal investigator on multiple research projects in Jamaica, Malaysia, Moldova, North Macedonia, Philippines, Romania, South Africa, Sri Lanka, Tanzania, Thailand, and Uganda.

I am also the CEO and co-founder of [Parenting for Lifelong Health](#) (PLH), a charitable social enterprise working closely with World Health Organisation and UNICEF to support the scale-up of parenting programmes in the Global South.

I co-led an international, multi-agency response that has provided open-source and freely available [evidence-based parenting resources](#) to over 210 million people in more than 196 countries and territories to reduce the impact of COVID-19 on violence against children and poor child wellbeing.

I am also the former executive director and founder of Clowns Without Borders South Africa (www.cwbsa.org), a humanitarian arts-based intervention that provides psychosocial support to vulnerable children and families through humour and play.

I hold a DPhil in Social Intervention at the University of Oxford's Department of Social Policy and Intervention. I also hold degrees from the University of Oxford (MSc with distinction), Yale University (BA with distinction), and the Dell'Arte International School for Physical Theatre.

I am also a storyteller, banjo-player, singer-songwriter, clown, director, and facilitator.
